

### HI 970AXT

### The HL970A Wheel Loader is part of Hyundai's

**A-Series:** a fresh generation of construction equipment that complies with the European stage V emission levels. But it does much more than that! While fulfilling regulatory demands, Hyundai aimed for a ground-breaking level of customer satisfaction with maximum performance and productivity, better safety, more convenience and improved uptime management.

Featuring impressive power matched with carefully selected technologies that help you to work more efficiently and economically, this 24-tonne loader opens up a world of new possibilities. It's time to experience the Hyundai Effect!

HYUNDAI HL970A WHEEL LOADER HL970A

# ENTER A WORLD WHERE ANYTHING IS POSSIBLE

### **Productivity**

- · Load sensing hydraulic system
- · Accurate weighing system
- · Eco pedal (option)
- Eco Report
- Smart Power mode
- · Hydraulic differential lock
- 5-speed transmission with lock-up clutch
- Intelligent clutch cut-off (ICCO)
- Automatic engine shutdown

### **Durability/Safety**

- Unified control valve
- Enhanced axle capacity
- · AAVM camera system (option)
- Radar rear detection (option)
- IMOD (Intelligent Moving Object Detection) (option)
- · Premium quality axles
- Axle cooling (option)
- · Thermostat-based transmission cooling
- · Optimised drive shaft
- · Completely sealed engine room
- High grade hoses
- · Foldable side mirror
- Seat belt warning alarm

### Comfort

- · Spacious soundproofed cabin
- · Wide touchscreen monitor
- · Ride control system
- · Fully adjustable seat and armrest
- Remote door control (option)
- · Soft end stop

### Serviceability

- ECD (Engine Connected Diagnostics)
- · Fully openable engine hood
- Hi-MATE telematic system
- Easy filter replacement
- Auto greasing system (option)
- · Wide core & fin radiator

A CABIN DESIGNED AROUND YOU

The HL970A cabin was designed to be a productive, stress-free working environment that fits every operator perfectly. Pleasant and spacious, it features state-of-the-art noise and vibration reduction technology, achieving a sound level of only 70 dB, one of the lowest in this machine category. The high-quality, adjustable seat provides comfortable reach to all controls. A range of technologies enable easier machine monitoring, while the audio system includes radio, USB and AUX input to keep you entertained during your working day.

The **instrument panel** is optimised to provide quick, easy access to machine status information as you work. It features a seven-inch **touchscreen monitor** for excellent legibility.

The **soft end stop** function reduces the hydraulic speed of the cylinder as it reaches the end of its stroke. This lessens the shock load of the stroke for increased operating comfort and better material retention.

All the indicators displaying machine status are centralised in one cluster to enable easy, efficient control.

The **Eco Report** feature makes

it easy for operators to develop

displaying real-time information

efficient working habits by

about machine performance.

## EXTRA PROTECTION FOR CO-WORKERS AND EQUIPMENT

Details can make a huge difference when it comes to safety, especially if you're working in rough conditions. It's not just a matter of complying with rules.

The HL970A's safety features are designed and tested to meet your needs in the real world, even offering an extra pair of eyes with the optional All-Around View Monitoring (AAVM) and radar systems. Operating confidence is improved by technologies that provide a feeling of stability and smooth performance in high-load work. By helping to ensure a calm, accident-free worksite, this wheel loader adds to the productivity and peace of mind that are all part of the Hyundai Effect.

"For such a tough-looking machine, its performance is surprisingly smooth and predictable. It gives me extra confidence and a feeling of safety in any conditions."

A **ride control system** with a piston accumulator reduces pitching of the wheel loader body and bucket for more stable and comfortable operation. It also minimises spillover, adding to convenience and productivity.

A hydraulic locking differential prevents tyre slip for more secure operation as well as better productivity and fuel economy.

The optional **Advanced Around View Monitoring (AAVM)** system gives you a 360° overview of your immediate working environment. It also includes Intelligent Moving Object Detection (IMOD) technology that senses and warns you when people or objects come within five metres of the machine.

The **side mirror** is easy to adjust for optimal visibility and can be folded away to prevent damage during transportation.

Operators are reminded to fasten their safety belt by an audible and visible alarm.

The optional **radar system** detects obstacles behind the machine day and night, with no blind spots. The distance between the obstacle and the loader is displayed on the monitor.

# TAILORED TECHNOLOGIES TO BOOST YOUR PRODUCTIVITY

The HL970A's reliable Cummins L9
Stage V engine delivers immense
power to handle heavy-duty work in
extreme conditions. It is complemented
by a range of technologies that
enhance fuel efficiency while keeping
harmful emissions to a minimum.

Precise operating systems help you to get the most out of this mighty machine, including optimised power matching for the ultimate balance of torque and RPM. When operated in Power Smart mode, the engine delivers fuel savings of up to 5% as well as smooth performance in high-load work such as digging. Hyundai's proprietary weighing system technology is integrated as standard. Additional control, monitoring and maintenance features help you to optimise performance and productivity every single day, on any worksite.

Like all A-Series machines, the HL 970A features our **all-in-one exhaust aftertreatment system** which cuts emissions and operating costs while enhancing reliability and simplifying maintenance.

The highly accurate **automatic/manual cumulative weighing system** helps you to manage production more efficiently in any environment. For maximum precision, weighing error icons and a two-colour weight value indicator are displayed on the monitor.

The new **Smart Power mode** adjusts engine RPM in heavy load work like digging to save fuel without compromising on performance. The technology also achieves an optimal balance between traction and breakout forces.

The **engine shuts down automatically when the machine is at rest** to cut fuel consumption and prevent unnecessary emissions. Different operating modes and idling times can be selected according to the work environment, further enhancing efficiency.

The HL970A is equipped with a **five-speed transmission and a lockup clutch**, allowing you to work more efficiently while keeping fuel consumption and emissions low.

To protect your business, you need to know that the investment you make today will sustain your profits over the long term. That's why we prioritised reliability throughout the development of the HL970A, from design and manufacturing to quality control. The axles,

driveshaft and all operating systems have been optimised for endurance and tested rigorously on a range of work sites. The result is a tough, durable workhorse that minimises downtime for repairs and maintenance and helps you to protect your profits.

The HL970A is equipped with a **thermostat for transmission cooling**. This feature helps to warm up the fluid quickly and keeps it at the optimal working temperature, protecting components and increasing efficiency.

**High-grade hoses** with outstanding resistance to heat and pressure provide maximum durability, even in rough working conditions.

The Intelligent Clutch Cut-Off (ICCO) function minimises loss of power in the torque converter and prevents excessive power use during braking. This reduces heat generation and wear on the brake disc.

The hydraulic system has been simplified with a unified control valve system. This removes the need for hydraulic hoses connected to each valve, decreasing the number of possible leak points.

The HL970A features **premium quality axles with enhanced load capacity** for better reliability and durability.

A separate **axle oil cooling system** is available as an option to prevent overheating during high-load work or tasks requiring frequent braking.

### EASY SERVICING FOR TROUBLE-FREE OWNERSHIP

The peace of mind that comes with quick, low-effort servicing is part of what we call the Hyundai Effect. The HL970A is designed to make maintenance as convenient as possible. The engine hood opens wide to provide easy access for cleaning and routine tasks. All components and materials have been optimised to ensure a long, trouble-free life.

Hyundai's Hi-MATE remote management system can be integrated as an option to provide the highest level of service and support. The HL970A also features our new Engine Connected Diagnostics (ECD) system which immediately reports any engine failure to both Hi-MATE and the engine manufacturer to ensure the fastest, easiest resolution.

### Hi MATE

Hyundai's exclusive Hi-MATE remote management system allows you to monitor your machines from any location via a dedicated website or mobile app, with access to diagnostics and working parameters like total engine hours, actual working hours and fuel consumption. The system makes it easy to evaluate machine productivity and plan servicing and maintenance tasks, as well as any required cost saving measures. It also offers geofencing to protect your machines against theft and unauthorised usage.

Our new Engine Connected Diagnostics (ECD) technology supports service technicians by providing remote diagnostics reports so that they can prepare properly for site visits.

With the optional **auto greasing system**, grease is applied to lubrication points automatically when needed. The correct dosing is ensured and lubricant is applied uniformly, reducing grease consumption and eliminating waste.

The tilt-back engine hood is fully retractable and can be opened electrically for easy access to the sealed engine room and cooling room. The engine room is designed to prevent the possibility of fire caused by the inflow of foreign materials.

The **air conditioning filter** is easy to replace and is made from a specially selected material for superior performance.

The HL970A has a dependable wide-core and fin air cooler that prevents performance degradation caused by contamination.

HYUNDAI HL970A WHEEL LOADER HL970A 11

# FOCUSED TECHNOLOGIES FOR THE RESULTS YOU WANT

Hyundai's A-Series wheel loaders are designed to create better conditions for operators and deliver the ultimate ownership experience. Every detail is carefully fine-tuned to match your needs in the field, including better safety and comfort, higher productivity, maximum uptime and easy servicing. This is all part of the Hyundai Effect.

See more at hyundai-ce.eu

### **SPECIFICATIONS**

ENGINE	
Maker / Model	CUMMINS L9 / EU Stage V
Туре	6 Cylinder, Watercooled, 4-Cycle, Turbocharged Charge aircooled, Direct Injection, Electronic Controlled Diesel Engine.
Gross Power (SAE J1995)	325 HP (242 kW) at 2.100 rpm
Net Power (SAE J1349)	322 HP (240 kW) at 2.100 rpm
Max. Power	330 HP (264 kW) at 2.000 rpm
Peak Gross Torque (SAE J1995)	1636 N m (1,207 lb ft) at 1.100 rpm
Displacement	8.9 I (543 cu in)
Aftertreatment System	DOC, DPF, SCR, Waste Gate Turbo

 The indicated net power is available for the flywheel when the engine is equipped with a fan, alternator, air cleaner, and after-treatment device.
 The indicated gross power is obtained with the fan at maximum speed.

TRANSMISSION

### **AIR CONDITIONING SYSTEM**

The air conditioning system of this machine contains fluorinated greenhouse gas refrigerant R134a (GWP = 1430). The system contains 0.75 kg of refrigerant (1.07 metric tonne  $\rm CO_2$  equivalent).

### SOUND

Guaranteed noise level presented below can be differed depending on a range of factors such as operating condition, speed of a cooling fan, types of engine and so forth. Hearing protection shall be necessary if an operator is working in the improperly maintained cabin or exposed to a noisy environment by leaving doors and/or windows open.

With Cooling Fan Speed at Maximum Value:

Operator Sound Pressure Level (ISO 6396:2008) 70 dB(A)

Exterior Sound Power Level (ISO 6395:2008) 107 dB(A)
